Greetings,

I am seeking, under the Illinois FOIA Act documents relating to Hailstorm (a trademarked IMSI Catchers sold by Harris Corp). Cell site simulators, also known as IMSI catchers masquerade as cellphone towers to obtain data secretly from nearby cellular user devices.

Under FOIA, I request:

+ Any and all contracts, invoices, purchase orders, proposals, sales or marketing materials, and contract negotiation records for Hailstorm IMSI Catchers.

+ Invoices related to Hailstorm training. Note: Hailstorm IMSI Catchers are upgrades from "Stingrays" so training may be considered an "upgraded training".

+ Documents sufficient to show where the funding for Hailstorms came from. Included in this request in any grants, programs, budget allocation, or federal program that funded the purchase, training, or continued use of Hailstorms.

+ Documents sufficient to show reception of Hailstorms.

Note: IMSI Catchers, TMSI, and devices like them that "mimic" cell phone towers can be a bit confusing. Should you have any questions about the request, please let me know so I can clarify the request.

Please send me these records and any communications only by email to this email address. Please do not send me anything by U.S. Mail or any other medium except for email. Please send all records as PDFs by email, or if that's not possible, over a file-sharing service like Drop Box. Contact me to discuss if that is not possible. There should not be any copy charges, but if you contend that there are, contact me first. This request is not for a commercial purpose. Please do not redact any portion of any records that you believe to be non-responsive to my request; I would like the complete copies of all records that have any responsive information in them.

Thank you,

Freddy Martinez
