Sorry I had not responded earlier.

I thought we discussed on the phone that (according to notes from Morphotrack) you should be accessing the Mugshot Database server on IP address [REDACTED]. You said you would try a Telnet session to port 1521 at this IP and if that timed out then we could conclude that this was the wrong IP address or that the routing is not in place.

Please give Telnet a Try and also try a [REDACTED] per connection to [REDACTED].

Your screen shot below shows you forgot to insert an [REDACTED] Try entering [REDACTED] there. As discussed, the value shown in my screen shot is the local IP address from within the Chicago Police network so don't use that one.

The [REDACTED] mentioned below are the ones you said you use to reach the CLEAR database server (a completely different machine) so those will definitely not work for mugshots. If you are reaching the CLEAR database listener, it does not recognize that service name so it will refuse connection.

Let me know how that goes.

Copying PSIT management to keep them in the loop as well.

Thanks,

Hi Scott,

I am cc'ing Deputy Chief, Director of SOIC John Blair and Deputy Allen Zeitler from CCSO who are also working on getting a path to this DB.

Let me know if there has been any movement in gaining access – thanks again for all of the help last Friday.

Best,
Casey

Subject: CPD Offender Images for Cook County

Hi Scott,

I hope this note finds you well. We received your contact information from Jonathan Lewin and we work with Robert McInerney at Cook County – Palantir serves as the data analysis platform for CCSO.

We currently have access to the CPD Clear Incidents and Arrests database but have been in search of a connection to query for offender images for some time. Jonathan indicated that you could help us with the details necessary to access the images. Previously, we were told we could access the images at [REDACTED] - however it doesn't seem that we can access that server or database due to firewall restrictions.

Let us know if you have an additional way to access the images or can assist us in removing the firewall restriction. If you'd like to discuss via phone, just indicate an available time.

Kind regards,
Casey

Very interesting. We are looking hard at Palantir. Any experience with the system? I believe Tiffany spoke to a colleague at Cook County. Unfortunately, I won't be able to make the trip to Monterey this year. Maybe next year.

Essentially it's a model that looks at criminal social networks and connections from a primary subject to their co-arrestees (up to two levels of association) to predict future parties to violence-- the model tests its predictions with actual outcomes so it can be refined to become more accurate.

Happy to discuss when you're free-- are you going to the conference at NPS? Mike Mealer, Josh Dennis and Marty Ryczek (prior cohort) and I are going...

So, if you can share, what is the system or "system of systems"? We are hoping to introduce, by way of technology, a "predictive" element to our intelligence led tactical analysis tool (ILTAT) project concept. And, I have not forgotten about you. I was out of the office last week. Busy putting out fires this week. I passed your note to Tiffany and was going to follow her lead. I will circle back with her. Thanks Jonathan.

Sent: Friday, May 09, 2014 10:23 AM
Subject: Meeting Agenda for Tuesday May 13

Gentlemen,

I hope all is well. The Chief of Staff would like to also discuss the County's Palantir System at our meetings on Tuesday May 13. Correspondence on Palantir is below.

So, the topics that the Chief would like to discuss on Tuesday May 13 from 1030 to 1130 are:

1. Data Sharing with County
2. The Palantir System
3. OIG Access to CLEAR

All docs concerning data sharing with the county and OIG access to CLEAR are embedded within the scheduled invite. Thank you and have a great day.

Best,
Mark

Subject: FW: 2014 UASI Requests

Jon,

DEMC

After speaking with Executive Director Schenkel, below please find correspondence between our office and the Cook County Sheriff's Office (CCSO) regarding their Palantir deployment and request for UASI funding to support the same.

It is my hope that this will both be helpful to your conversation as well as convey how we – the DHSEM – are trying to drive the regional intel collaboration message strong...these tools should be developed collaboratively and should be based around our regional Fusion Center, at CPIC – not siloed. The door is open for all to walkthrough, but money is not available for independent investments in stove-piped technology systems...

I would ask that you please keep the communication confidential between the Executive Director, COS Roussell, you and me.

We look forward to enhancing our cooperation and I remain hopeful that other parties may choose to join our efforts. I would like to follow-up ASAP on the idea of an MOU for some technology development on your systems related to emergency management.

Thanks,

Mike

Subject: Re: 2014 UASI Requests

Mike,

I am very familiar with Palantir's previous deployments; both because Palantir previously sent us much of the information contained in the email below as well as because our department initially had conversations with the CCSO wherein we suggested that the CCSO, the DHSEM and the City work collaboratively to pilot Palantir technology as a cooperative endeavor. I was then informed, months subsequent, that the CCSO was moving along on its deployment. One of the issues

with that deployment is that it did not meet, as a result of the limitations of the contract referenced, the broader all-hazards focus that our department would be interested in with respect to a data-ingest, analytics and dashboard system.

The nationally recognized Fusion Center for our region is the CPIC. As such, we are working very diligently to ensure all systems are fully supportive of and collaborative with the same, while maintaining and sustaining existing capacities within that system. The JRIC which you mention serves this purpose for the California agencies you reference. Similar to the Salt Lake City fusion center. In this, these are not merely regional intelligence centers, but entities which fulfill the same role which have also been designated by the federal government as Fusion Center. By the references, is it the desire of the CCSO to seek Fusion Center status?

Moreover, the DHSEM, OEMC, and CPD have already developed a collaborative Common Operating Picture which is in use by all three agencies and which was developed and supported by the County's BOT; moreover, our critical incident management system has been deployed and in use by the City, County, State and FEMA. It would seem that all systems should integrate, as ours currently do.

As you are aware, the goal of the UASI is not to create multiple centers and duplicative technology and infrastructures. Given the efforts of the existing Fusion Center, both ongoing and in process, and the UASI support provided to the same, as well as our desire to ensure a seamless partnership with the Fusion Center through all we do, if – given the capability you reference below – there is interest in proceeding with a regional effort and seeking funding for the same, I would suggest a meeting between the CCSO, DHSEM, CPD, OEMC, DOIT and BOT to discuss a merged and collaborative effort. This would seem to fit right into what appears to be the intent of your system while guaranteeing a truly regional system.

Please let me know your thoughts.

R/

Michael

Subject: 2014 UASI Requests

Michael,

As a follow-up to our meeting last week concerning our original UASI request as well as our supplemental report that was sent to you last Friday, I have received the following information concerning our Palantir request that I want to include with our request. For the below stated reasons, this request is important not only to the CCSO but to other law enforcement agencies as a very valuable asset to the Cook County region. This request would enable the CCSO to not only help sustain the existing resource but enable it to be expanded.

The Sheriff's Office Intelligence Center (SOIC) is a regional resource that is available to ALL law enforcement agencies throughout Cook County, and the entire Midwest region offering case support and situational awareness on a proactive and at-request basis. SOIC's doors are open to all who wish to make use of their resources, software and other investigatory tools. The Chicago Police Department takes advantage of these resources by assigning three detectives to work from SOIC full time. Palantir is a cutting edge software that connects previously disparate data sources into one single workspace to allow users the ability to take a regional view of crime trends, and engage in previously impossible high-level analysis. Palantir is connecting data sets from Chicago PD, CCSO, and all 128 suburban municipalities to allow for an unprecedented common operating picture. This is a resource that is now available to any and all law enforcement agencies who wish to take advantage of it, either through a SOIC analyst or investigator (as many suburban agencies work closely with SOIC this way) or by directly assigning someone to work from SOIC on a permanent or single-investigation basis. This regional collaboration is in the exact spirit of the Urban Areas Security Initiative and should be well received by those reviewing these requests.

Additionally, the precedent for supporting such an intelligence system, Palantir specifically, through UASI funds has been set by numerous other agencies throughout the country, including intel centers in Utah, NY, and several in California. In Los Angeles, the LAPD, LAFD, and LA Sheriff's Office all have Palantir deployments which are separately built, maintained, and funded by a combo of UASI and Capital dollars. The initial Palantir purchase was through the JRIC (Joint Regional Intelligence Center) which deployed Palantir prior to any involvement or use by LAPD or LAFD. The JRIC deployment was easily funded through UASI dollars as a regional intelligence center who offers resources to all who wish to make use of their offerings, very similar to SOIC. In Salt Lake City, the regional intelligence center used UASI funds to deploy Palantir in order to connect data from 12 agencies in the state of Utah, very similar to what SOIC is seeking to do by connecting calls for service data from 128 Cook County municipalities to arrest and jail data, to allow for a big picture of integrated data and high level regional analysis. While CPD might not be choosing to purchase a Palantir system of their own, it is certainly a resource that is available to them through SOIC and as such easily meets the regionally collaborative guidelines as set forth by UASI.

For all the above reasons, the CCSO hopes that our 2014 UASI request for this resource can be granted. If you have any questions, please feel free to contact me.

Mike

I think its worth but I still would like to know when she is going to have any data integrated. She clearly said she bought it for the entire city's use. Last thing Jon I brought it up with Janey Rountree yesterday. Cook County Intelligence purchased Palantir and connected it to ICLEAR and I'm told with UASI funds. If were all supposed to be playing together why aren't we added onto that UASI account and being able to use it? Just an FYI

Hey Jonathan,

Quick question for you --

In our meeting this week you mentioned that you guys have talked to 15 different municipalities recently regarding, I believe, RMS. We are actually working on a little internal project where we were hoping to "survey" the top 10-15 law enforcement agencies throughout the country regarding their investments in technology over the years, so we can try and paint a picture regarding the ongoing costs of technology in this field for the Sheriff and Executive Staff. Basically we are looking to talk with other LE agencies who can help us understand how they built their technology over the past decade or so, where they've succeeded and failed, how they've funded projects, etc...

We are meeting this afternoon on that project and it occurred to me that you may have some good contacts that you might be willing to pass along, given that it seems you've maybe had similar discussions with some folks recently?

Also, hopefully by next week we should have a better idea of how to get you guys some Palantir access. We've got a call on Tuesday where I hope to get the firewall questions answered so I'll shoot you an update then.

Thanks much.
