Hello,

If you recall last week we discussed using Crystal Reports as a short term approach to notifying the State Attorney Office of any vehicle that is seized with in 14 days for probable cause hearing.

I have been working with Jonathan Lewin's team, Eric Gaffney to allow access into the data warehouse. Eric has provided these figures: The project will take about one week and the approximate cost is \$3,010.00.

35 hours @\$86/hr=\$3,010.00

Task to include:
Add columns to tables 4hr
Add columns to views 4hr

Modify ETL Script 5hr
Test Script 4hr
Create update Script for current records 4hr
Test Script 6hr
Run Script 4hr
Review 4hr

I believe this is the last figure you needed from me and if I can be of any further assistance you can reach me on my cell phone [REDACTED]

Subject: RE: HB 3157 - Vehicle Tow Reports

Automation of the Tow Report will be integrated into a new Unified Front End that is funded but will take approximately six (6) months to complete. This will be a comprehensive reporting platform that will replace the current AIRA (Automated Incident Reporting Application), Contact Cards, Suspicious Activity Reporting/ Information Report, Traffic Crash Report, and Tow Report. It would be cost-prohibitive to develop a separate and non-integrated tow report independent of this larger effort, but if we had to put a cost on it, I'd say it would be in the \$100,000.00 range to include mobile deployment, back-office integration, eTrack modifications, and reporting capability.

Subject: HB 3157 - Vehicle Tow Reports

I want to be perfectly clear in regards to the HB3157 and the ability of the Asset Forfeiture Unit (AFU) to notify the States Attorney Office of upcoming VEHICLE forfeitures within 14 days for a probable cause hearing for seizure.

AFU will need Vehicle Tow Reports to be online and/or the vehicle seized information to be populated in e-Track as property so that AFU can query on a daily basis vehicles that are seized for forfeiture.

Currently, I am working with Lt. Eugene Vann from Research and Development and Eric Gaffney and Thao Nguyen from the I.T. section to back door the system with a Crystal Report. Unfortunately, there are issues and modifications will need to be addressed in the Data Warehouse. The Crystal Reports will be a work in progress and will only be a Band Aid to the problem; however, IF the report is accomplished it will work for CPD's needs. The report will need to be verified with the SAO to ensure that it captures all the information they require for the probable cause hearing.

With this being said - If any of the aforementioned factors are not in place, I do not foresee AFU meeting the requirements under HB3157 for VEHICLE FORFEITURES with the current process that we have in place.

I just want to be clear on AFU's part.

Subject: HB 3157 - Vehicle Tow Reports

I want to be perfectly clear in regards to the HB3157 and the ability of the Asset Forfeiture Unit (AFU) to notify the States Attorney Office of upcoming VEHICLE forfeitures within 14 days for a probable cause hearing for seizure.

AFU will need Vehicle Tow Reports to be online and/or the vehicle seized information to be populated in e-Track as property so that AFU can query on a daily basis vehicles that are seized for forfeiture.

Currently, I am working with Lt. Eugene Vann from Research and Development and Eric Gaffney and Thao Nguyen from the I.T. section to back door the system with a Crystal Report. Unfortunately, there are issues and modifications will need to be addressed in the Data Warehouse. The Crystal Reports will be a work in progress and will only be a Band Aid to the problem; however, IF the report is accomplished it will work for CPD's needs. The report will need to be verified with the SAO to ensure that it captures all the information they require for the probable cause hearing.

With this being said - If any of the aforementioned factors are not in place, I do not foresee AFU meeting the requirements under HB3157 for VEHICLE FORFEITURES with the current process that we have in place.

I just want to be clear on AFU's part.

Hello,

If you recall last week we discussed using Crystal Reports as a short term approach to notifying the State Attorney Office of any vehicle that is seized with in 14 days for probable cause hearing.

I have been working with Jonathan Lewin's team, Eric Gaffney to allow access into the data warehouse. Eric has provided these figures: The project will take about one week and the approximate cost is \$3,010.00.

35 hours @\$86/hr=\$3,010.00

Task to include:

Add columns to tables 4hr

Add columns to views 4hr

Modify ETL Script 5hr

Test Script 4hr

Create update Script for current records 4hr

Test Script 6hr

Run Script 4hr

Review 4hr

I believe this is the last figure you needed from me and if I can be of any further assistance you can reach me on my cell phone [REDACTED].

Subject: RE: HB 3157 - Vehicle Tow Reports

Automation of the Tow Report will be integrated into a new Unified Front End that is funded but will take approximately six (6) months to complete. This will be a comprehensive reporting platform that will replace the current AIRA (Automated Incident Reporting Application), Contact Cards, Suspicious Activity Reporting/ Information Report, Traffic Crash Report, and Tow Report. It would be cost-prohibitive to develop a separate and non-integrated tow report independent of this larger effort, but if we had to put a cost on it, I'd say it would be in the \$100,000.00 range to include mobile deployment, back-office integration, eTrack modifications, and reporting capability.

Subject: HB 3157 - Vehicle Tow Reports

I want to be perfectly clear in regards to the HB3157 and the ability of the Asset Forfeiture Unit (AFU) to notify the States Attorney Office of upcoming VEHICLE forfeitures within 14 days for a probable cause hearing for seizure.

AFU will need Vehicle Tow Reports to be online and/or the vehicle seized information to be populated in e-Track as property so that AFU can query on a daily basis vehicles that are seized for forfeiture.

Currently, I am working with Lt. Eugene Vann from Research and Development and Eric Gaffney and Thao Nguyen from the I.T. section to back door the system with a Crystal Report. Unfortunately, there are issues and modifications will need to be addressed in the Data Warehouse. The Crystal Reports will be a work in progress and will only be a Band Aid to the problem; however, IF the report is accomplished it will work for CPD's needs. The report will need to be verified with the SAO to ensure that it captures all the information they require for the probable cause hearing.

With this being said - If any of the aforementioned factors are not in place, I do not foresee AFU meeting the requirements under HB3157 for VEHICLE FORFEITURES with the current process that we have in place.

I just want to be clear on AFU's part.

Subject: RE: HB 3157 -

Hello,

If you recall last week we discussed using Crystal Reports as a short term approach to notifying the State Attorney Office of any vehicle that is seized with in 14 days for probable cause hearing.

I have been working with Jonathan Lewin's team, Eric Gaffney to allow access into the data warehouse. Eric has provided these figures: The project will take about one week and the approximate cost is \$3,010.00.

35 hours @\$86/hr=\$3,010.00

Task to include:
Add columns to tables 4hr
Add columns to views 4hr
Modify ETL Script 5hr
Test Script 4hr
Create update Script for current records 4hr
Test Script 6hr
Run Script 4hr
Review 4hr

I believe this is the last figure you needed from me and if I can be of any further assistance you can reach me on my cell phone [REDACTED]

Subject: RE: HB 3157 - Vehicle Tow Reports

Automation of the Tow Report will be integrated into a new Unified Front End that is funded but will take approximately six (6) months to complete. This will be a comprehensive reporting platform that will replace the current AIRA (Automated Incident Reporting Application), Contact Cards, Suspicious Activity Reporting/ Information Report, Traffic Crash Report, and Tow Report. It would be cost-prohibitive to develop a separate and non-integrated tow report independent of this larger effort, but if we had to put a cost on it, I'd say it would be in the \$100,000.00 range to include mobile deployment, back-office integration, eTrack modifications, and reporting capability.

SDNY asset forfeiture chief talks synergy, fraud and best practices

**Like what you see?
Got a story idea?**

Contact Asset Recovery Watch Editor David Quinones and get involved.

Sharon Cohen Levin has been chief of the Asset Forfeiture Unit in the Southern District of New York for 15 years, but now more than ever, her office is under pressure to show results. She has seen forfeiture go from "something that was used occasionally" to a regular part of fraud prosecution. Asset Recovery Watch Editor David Quinones caught up with Cohen Levin to discuss the successes and challenges to disarming criminal enterprises and fraudsters. [Read More...](#)

IAAR Forum: Using link analysis software to help your case

The IAAR Forum Community asks you: What are your recommendations for link analysis software? What qualities are desired and do they really make a difference in the long run? How can you tell if you've found the right solution? Tell us what experiences you've had with link analysis, what tools you've used and how it helped (or didn't help) your case. Picard, amid criticism for legal methods, recovers \$10 billion in Madoff case to date

Everyone's mad at Irving Picard. To be fair, his job is thankless: He's the court-appointed bloodhound in charge of hunting down money for the victims of Bernard Madoff, a man who was so skilled at hiding money that he kept the biggest scam in the history of American finance going

for at least two decades. [Read More...](#)
