This is still very much on the radar. Just trying to get ducks in a row. Also, we've had some conversations with a major private funder that is interested in putting forth dollars for the same intent: multi-jurisdiction/cross-discipline information sharing that is critical to facilitating the city's efforts to address street violence. Would you be available to get together next week for a coffee or beer to discuss the Palantir idea and draw-up some alternative approaches?

One thing that comes to mind is Palantir, which you've probably heard of. I saw a demo at Cook County Sheriff's Intel group and they love it. In fact, they're using CLEAR Arrest data, among other sources. I don't have any immediate funding to buy it. It's by definition an interoperability tool, since it allows multiple nodes and disparate data sources to be connected. We have a contract in place that only requires some minor modifications to use immediately. The tool could be a great asset in analytics support for violent crimes/ gun / gang crimes. Any sense of the funding opportunity, and timing? I'll tickle Chief Tracy with this...

Jonathan / Michael,

We are currently accessing your data warehouse as a central source for all bookings in Cook County. I know our Livescan environment feeds both you and the state. We are leveraging Palantir to do our data analytics and would like to sit down with you to better understand what is, and is not in the warehouse, as well as to talk to you about other information we would like to acquire.

Do you have any time next week that we could come down and have a high level discussion? I have openings Tuesday after 3pm and all day Friday.

Bob.

Subject: RE: WPO Chicago Follow-Up - UPONUS Technologies, LLC - Technology Overview

FYI- had a brief conversation with Mike Masters re: Palantir. He's interested in working with us to develop a platform that could be shared with city-county for analytics. The benefit for us would be that he'd be willing to fund part of it. The Cook County Sheriff's intel group purchased a small implementation as well-- but Mike either doesn't want to or can't partner with them (probably for political reasons, I'm guessing). I asked him to bring it up with you as well.

I haven't seen Palantir in use yet, but the city did make a small investment (in the 400k range) and will soon have a contract with a \$12 million limit (not funded, just contract limit) that we could potentially leverage. I did meet with Palantir and asked for a rough ballpark as to what it would cost to implement for CPD (with appropriate data sources)-- they estimated in the \$3 million range. Mike's been to NYPD to see Palantir in use there, and I'd like to go see it as well. I want to compare its features to a framework we're now building in-house using ArcPortal and other tools to see if it's worth it.

Subject: RE: WPO Chicago Follow-Up - UPONUS Technologies, LLC - Technology Overview

I'd be curious as to where this has been deployed-- especially in another large-scale implementation. If the concern is data security on the mobile data networks, our LTE traffic is already encrypted and the city will be purchasing a Mobile Device Manager (MDM) solution for our smartphones that will provide better security for potential lost/ stolen devices and for local device control. Our PDTs and Department-owned phones are on a private IP network with its own secure tunnel to the Verizon switch. The odds that someone could intercept our LTE voice or data transactions are very low...

I think it's worth exploring if you think there's a need for it perhaps for the BYOD users where we may not have as much control over the device, but I'd want to look at the cost/ benefit analysis. I have other concerns that are much more challenging, such as securing data loss from the enterprise network where users can easily use a USB drive and remove data, or access their gmail account with full encryption from the workstation through our network and to the gmail server, making it almost impossible for us to determine what's being sent to or from our enterprise. There are tools to help mitigate this, in the \$500k range.

I'm happy to explore further with this vendor if you'd like...

Subject: WPO Chicago Follow-Up - UPONUS Technologies, LLC - Technology Overview

It certainly was a pleasure meeting you and the rest of the team. I now understand a lot better why the Mayor chose Superintendent McCarthy. His briefing was both enlightening and impressive. Given what you and I had talked about regarding our Secure Mobile Application, I hope that we might be able to be part of the solutions required to continue to enhance and improve our city's first responder's and law enforcement 's services.

Per our discussion, I have attached two documents for your review. One is a PowerPoint Briefing, the other is an overview White Paper. Both provide additional details and context about our Secure Mobile Communications Application. Ultimately, it is a question of how easy is this application to use, how well does the application perform, and is it as adaptable and flexible enough to allow the Police and other first responders do their jobs easier and more efficiently in the areas of shared secured communication. I hope to be able to not only show you and but to prove to you that this is the superior solution.

I will call you next week to discuss them further. Please let me know if there are some better days and times for us to talk.

Hope you have a great weekend.

Subject: Follow-up

Cmdr Lewin,

Hope you are well. I left a voice message with you yesterday (I had a rather last minute trip to Chicago, actually!). Sorry to miss you.

I would like to follow-up on connecting with Superintendent McCarthy, specifically to frame potential Palantir engagement around our proven outcomes in supporting homicide reduction in New Orleans. I hope we can continue the discussion in that direction.

I will be OOTO through September 1. I will be checking email sporadically – and else, would look toward any dates in September to schedule a visit with the Superintendent. Please let me know of any updates on your end. At latest, I'll forward to connecting once I am back in country.

Very best,
Katie

Subject: Re: Info

Keep in mind that there are 100's of companies that have the exact same approach to social media. Even Palantir's social media solution, torch, is using the same approach.

Also, nobody has the fully automated social network analysis capability they we have. Everyone need to manually connect one node (person) at a time.

We can discuss this and more on Thursday or even tomorrow.

This is still very much on the radar. Just trying to get ducks in a row. Also, we've had some conversations with a major private funder that is interested in putting forth dollars for the same intent: multi-jurisdiction/cross-discipline information sharing that is critical to facilitating the city's efforts to address street violence. Would you be available to get together next week for a coffee or beer to discuss the Palantir idea and draw-up some alternative approaches?

One thing that comes to mind is Palantir, which you've probably heard of. I saw a demo at Cook County Sheriff's Intel group and they love it. In fact, they're using CLEAR Arrest data, among other sources. I don't have any immediate funding to buy it. It's by definition an interoperability tool, since it allows multiple nodes and disparate data sources to be connected. We have a contract in place that only requires some minor modifications to use immediately. The tool could be a great asset in analytics support for violent crimes/ gun / gang crimes. Any sense of the funding opportunity, and timing? I'll tickle Chief Tracy with this...

Sent: Thursday, May 29, 2014 7:38 AM
To: Berman, Brenna
Cc: Schenk, Tom
Subject: Federal Funding

Brenna,

Per our conversation, attached was the approved budget modification for the Transportation Security Administration (TSA) Transit Security Grant Program (TSGP) 2009, where we utilized \$677,287.00 for the Exalytics server (\$130,582.00) and Exadata server (\$546,705.00).

I'll reach out to Tom re: the possibility of moving the Exalytics server here to HQ, at least as a test, to see if we can make it work. I don't want to abandon it, especially if it's close to providing a critically-needed function during the summer.

Thx

Mike,

I wanted to introduce you to Commander Jonathan Lewin from Chicago Police Dept. Jonathan worked closely with Brett Goldstein when he was with the city and is the lead on many tech and data projects. He is planning a trip to NYC in March or April to take a look at NYPD tech and data platforms. He has some specific questions around palantir and other tools (my knowledge is already getting thin here). He has some connections to NYPD through McCarthy and Chief Tracy but we're wondering if you have any specific people in mind that Jonathan should try to meet with while there?

Jonathan, Mike and I worked together in the NYC mayor's office. He started and ran our data analytics unit and worked closely with CPD and other city agencies. He is now doing similar stuff at NYU.

Mike - hope you're doing well!!

Subject: Follow-up

Cmdr Lewin,

Hope you are well. I left a voice message with you yesterday (I had a rather last minute trip to Chicago, actually!). Sorry to miss you.

I would like to follow-up on connecting with Superintendent McCarthy, specifically to frame potential Palantir engagement around our proven outcomes in supporting homicide reduction in New Orleans. I hope we can continue the discussion in that direction.

I will be OOTO through September 1. I will be checking email sporadically – and else, would look toward any dates in September to schedule a visit with the Superintendent. Please let me know of any updates on your end. At latest, I'll forward to connecting once I am back in country.

Very best,
Katie

Bob, probably would need to be our DBA or something... We'd need to look at how exactly you're interfacing with the arrest data... Also I wonder if you'd be willing to give us a temporary account (with appropriate restrictions) to try out the system?

Thanx
Jonathan

Subject: RE: TurboTax stops processing state tax returns on fraud reports

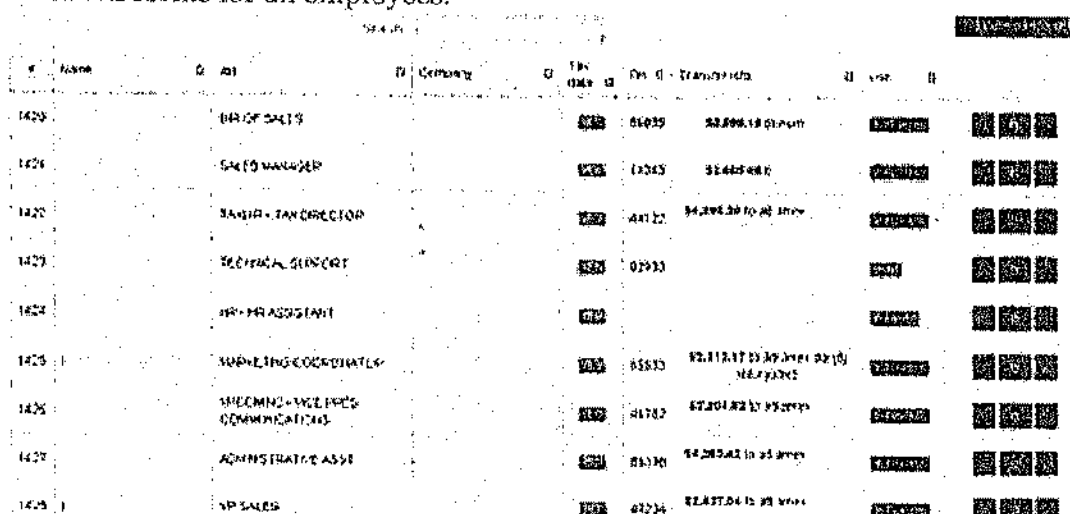

Thanks Gary. This reminded me of an article I saw last year. See below. Last year in April on Krebs, they focused on a tax fraud operation.

krebsonsecurity.com/2014/04/crimeware-helps-file-fraudulent-tax-returns

Crimeware Helps File Fraudulent Tax Returns

Many companies believe that if they protect their intellectual property and customers' information, they've done a decent job of safeguarding their crown jewels from attackers. But in an increasingly common scheme, cybercriminals are targeting the Human Resources departments at compromised organizations and rapidly filing fraudulent federal tax returns on all employees.

Last month, KrebsOnSecurity encountered a Web-based control panel that an organized criminal gang has been using to track bogus tax returns filed on behalf of employees at hacked companies whose HR departments had been relieved of W2 forms for all employees.

Name	ID	Company	Tax ID	Tax Amount
1423	1423	HR OF SALES	0123	\$1,000.00
1424	1424	SALES MANAGER	0124	\$1,000.00
1425	1425	SALES - TAX DIRECTOR	0125	\$1,000.00
1426	1426	TECHNICAL SUPPORT	0126	\$1,000.00
1427	1427	HR - HR ASSISTANT	0127	\$1,000.00
1428	1428	SUPPLYING COORDINATOR	0128	\$1,000.00
1429	1429	SPECIAL AGENT	0129	\$1,000.00
1430	1430	ADMINISTRATIVE ASSISTANT	0130	\$1,000.00
1431	1431	VP SALES	0131	\$1,000.00

An obfuscated look at the he control panel for a tax fraud operation involving more than a half dozen victim organizations.

Subject: TurboTax stops processing state tax returns on fraud reports

From today's Trib:

TurboTax, the country's most popular tax preparation software, said Friday it has temporarily stopped processing state tax returns due to an increase in fraudulent filings.

State agencies have reported a rise in filings that are using stolen personal information, said Intuit, the company behind TurboTax.

Most victims found out that a fraudulent tax return was filed in their name after receiving a rejection notice after filing their returns, said Intuit spokeswoman Julie Miller.

Intuit, the maker of TurboTax software, announced Thursday it would reverse changes to its tax-preparation product that required customers to spend more for some types of filings after the company was blitzed with complaints.

Intuit, the maker of TurboTax software, announced Thursday it would reverse changes to its tax-preparation product that required customers to spend more for some types of filings after the company was blitzed with complaints. (Tony Briscoe)

There haven't been issues with federal returns because the Internal Revenue Service has implemented stronger fraud detection policies, Miller said.

The company is working with security company Palantir to investigate the problem. So far, Intuit said there was no security breach of its systems. Instead, it believes personal information was stolen elsewhere and used to file returns on TurboTax.

Mike,

I wanted to introduce you to Commander Jonathan Lewin from Chicago Police Dept. Jonathan worked closely with Brett Goldstein when he was with the city and is the lead on many tech and data projects. He is planning a trip to NYC in March or April to take a look at NYPD tech and data platforms. He has some specific questions around palantir and other tools (my knowledge is already getting thin here). He has some connections to NYPD through McCarthy and Chief Tracy but we're wondering if you have any specific people in mind that Jonathan should try to meet with while there?

Jonathan, Mike and I worked together in the NYC mayor's office. He started and ran our data analytics unit and worked closely with CPD and other city agencies. He is now doing similar stuff at NYU.

Mike - hope you're doing well!!

Talk soon,

Janey

I met with that guy for breakfast this morning. It turned out he was actually quite pleasant after all. They are a company based in New Zealand that sells a lower cost alternative to Palantir. It sounds quite similar, so I guess it would not be of any interest to CPD, since you already have Palantir. They have not broken into the US market significantly - they mainly sell to Asia. Their applications are mainly around low-volume crimes, like financial crimes and organized crime, rather than things like burglaries.

The only slightly bad news is that they are trying to implement something like SSL within their link charting framework, but so far they are just beginning. He did not actually try to sell me anything, and did not express interest in meeting with you. I think he was more trying to learn about the state of our project and keep an eye on us. We agreed that we'd stay in touch in case there are future opportunities to collaborate in some way.

We had one point of agreement. He was very dismayed by the PredPol event. He said the product is very "rudimentary" and that he doesn't know of any other first-world country where the police chief could get up and do a sales pitch like the Atlanta guy did. He thought it was shameful.

Good morning Commanders,

Commander Caluris, it was pleasure meeting you last week and I am guessing that you may have caught up with Commander Lewin about our conversation regarding Palantir. To that end, I wanted to introduce you to Katie Laidlaw. She is the Palantir account exec that has been supporting Chicago and she also works with the County. She is the best person to talk with regarding demonstrations of other police departments using Palantir and any other questions that you might have. I'd be happy to coordinate a meeting since Katie is often in Chicago or a conference call if that is easier. Just let me know. Thank you.

Enjoy! I'll be in LA in two weeks to visit a friend -- I can't wait.

Are you going to the JRIC at all? Sgt Pete Jackson there has been a great contact of ours for the past few years. If you end up swinging by there, you should try and connect with him.

Have a great trip!

Hey Jonathan,

Quick question for you --

In our meeting this week you mentioned that you guys have talked to 15 different municipalities recently regarding, I believe, RMS. We are actually working on a little internal project where we were hoping to "survey" the top 10-15 law enforcement agencies throughout the country regarding their investments in technology over the years, so we can try and paint a picture regarding the ongoing costs of technology in this field for the Sheriff and Executive Staff. Basically we are looking to talk with other LE agencies who can help us understand how they built their technology over the past decade or so, where they've succeeded and failed, how they've funded projects, etc...

We are meeting this afternoon on that project and it occurred to me that you may have some good contacts that you might be willing to pass along, given that it seems you've maybe had similar discussions with some folks recently?

Also, hopefully by next week we should have a better idea of how to get you guys some Palantir access. We've got a call on Tuesday where I hope to get the firewall questions answered so I'll shoot you an update then.

Thanks much.

BB
