I met Hema at a Palantir demo for ITSC people yesterday. She mentioned this public safety demo, and forwarded me the invite. Would you like me to be there?

Jonathan,

Our interface between you and Palantir just failed. As we are still trying to get a new support contract, we don't have any resources on site that can trouble shoot the problem. Can you give me a name (and e-mail) of someone on your team that we can work with to see if anything changes with the format of your data?

Let me know.

Thanks.

Bob.

Subject: Palantir Training -- May 20-22

Hi Everyone,

Palantir will be back in town next week Tuesday May 20 - Thursday May 22 to conduct additional training sessions. We will be offering the Intro course again for anyone who missed that last time, as well as several sessions of advanced training for those who attended last month. I am attaching here the roster of individuals who attended last month's training for your reference.

Below you will find the dates and times that training will be offered, along with info on which level of training will be conducted during each time slot. Just as last time, you will need to register anyone from your unit who is interested in attending training. Please email me the names of individuals along with the date/time session they wish to attend. I will need your registration via email no later than noon on Friday, May 16th, please. I will send calendar invites for the sessions out that afternoon so you and your employees have time to plan.

Sessions are as follows:

Tuesday, May 20, 9:00 AM - 12:00 PM -- Intro (no previous experience required)
Tuesday, May 20, 1:00 PM - 4:00 PM -- Intro (no previous experience required)

Wednesday, May 21, 2:00 PM - 5:00 PM -- Advanced (previous 101 training required)

Thursday, May 22, 8:00 AM - 11:00 AM -- Advanced (previous 101 training required)
Thursday, May 22, 12:30 PM - 3:30 PM -- Advanced (previous 101 training required)

The Advanced training session will build upon the Intro, and will cover exporting profiles, timeline, team collaboration, creating and using filters, importing documents, and map analysis.

Classes will be held at South Campus, Building 5, Basement Training Room. Each session can accommodate up to 22 individuals. If there is an overwhelming demand for additional 101 Intro classes, we will do our best to add in an additional session to accommodate.

Please let me know if you have any questions. I can be reached at 312-590-0849.

Thanks much,

BB

Cmdr Lewin,

Thanks for your feedback. It does sound like focusing on technology and logistics will be better use of everyone's time. Can we spend a few minutes prioritizing which use cases should go first? That will help to understand the scope and focus on related technology for these use cases.

Hema

Subject: RE: Palantir at CPD

Hema,

We can keep the first part of the meeting focused on the use case but due to budget meetings this week I won't be inviting too many end users-- we understand what the use cases will be, and if we ingest the right data sources the platform will support them. I think it's less about the use cases and more about the logistics of getting this going.

Or, alternatively, we can make the entire focus at Noon on the technology and logistics, which might be more beneficial since, like I said, we know the use cases.

Let me know your thoughts...

Thx
Jonathan

Cmdr Lewin,

I agree. We will not have Janey attend the technical part of the discussion. I am suggesting that we split up the agenda between business (first 60 minutes) and then technical discussion (30 minutes).

Palantir is arriving on Tuesday. They are not available to meet on Monday. However, if you would like to keep the Tuesday meeting focused on business use cases, we can schedule another technical session at CPD for later in the day. Let me know which option will work the best for you and your team.

Thanks,
Hema

Hi Cmdr Lewin,

Is it possible to invite your technical team for the later part of the meeting? Palantir team would like to understand CPS databases better and they have some technical questions. We can allocation the last 30 minutes to the technical agenda. I have also forwarded the invite to Janey Rountree.

Thanks,

Hema

Subject: RE: CPD Offender Images for Cook County

John,

Thanks for the guidance below and for bearing with our delay in response, we were internally discussing options. As far as I understand this far, the network modification that we need made needs to happen within the Chicago Police network.

Specifically we need a change added that allows traffic to [REDACTED]
Cook County.

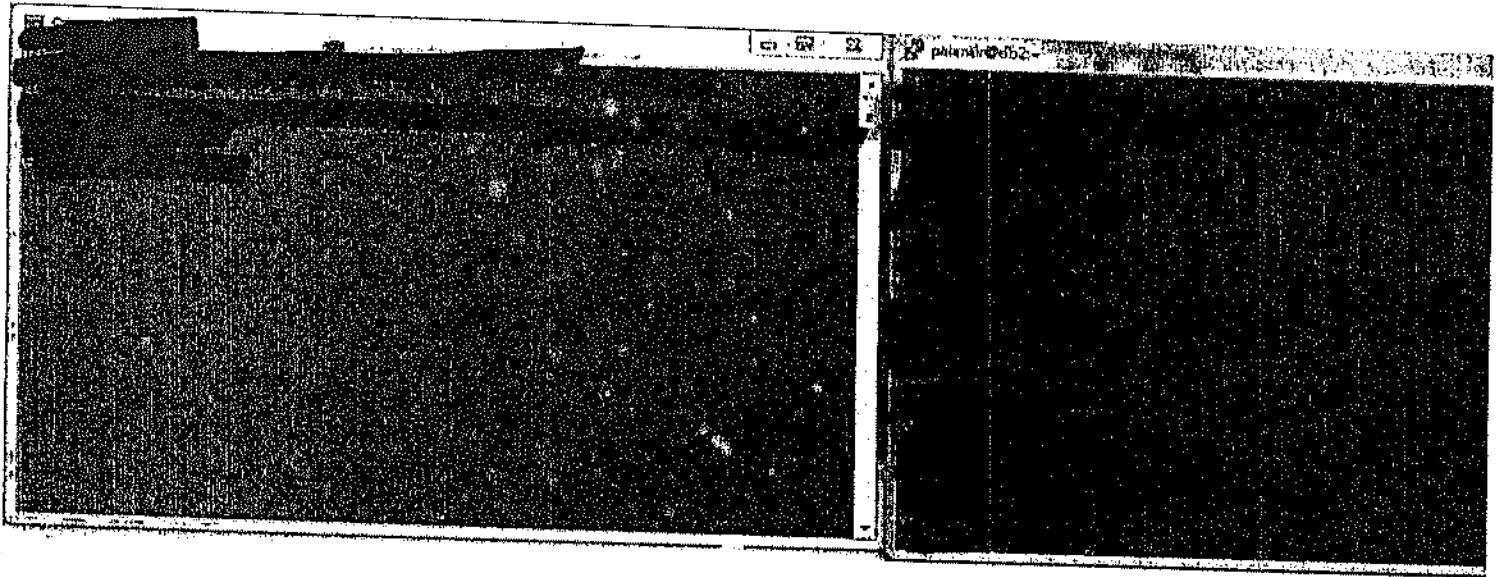

Let us know if this is clearly a Cook County NCC request but it seems it is on the Chicago Police network side. If this is accurate, can you request and/or make this change?

Best,
Casey

Hey Jonathan,

Quick question for you --

In our meeting this week you mentioned that you guys have talked to 15 different municipalities recently regarding, I believe, RMS. We are actually working on a

little internal project where we were hoping to "survey" the top 10-15 law enforcement agencies throughout the country regarding their investments in technology over the years, so we can try and paint a picture regarding the ongoing costs of technology in this field for the Sheriff and Executive Staff. Basically we are looking to talk with other LE agencies who can help us understand how they built their technology over the past decade or so, where they've succeeded and failed, how they've funded projects, etc...

We are meeting this afternoon on that project and it occurred to me that you may have some good contacts that you might be willing to pass along, given that it seems you've maybe had similar discussions with some folks recently?

Also, hopefully by next week we should have a better idea of how to get you guys some Palantir access. We've got a call on Tuesday where I hope to get the firewall questions answered so I'll shoot you an update then.

Thanks much.

One thing that comes to mind is Palantir, which you've probably heard of. I saw a demo at Cook County Sheriff's Intel group and they love it. In fact, they're using CLEAR Arrest data, among other sources. I don't have any immediate funding to buy it. It's by definition an interoperability tool, since it allows multiple nodes and disparate data sources to be connected. We have a contract in place that only requires some minor modifications to use immediately. The tool could be a great asset in analytics support for violent crimes/ gun / gang crimes. Any sense of the funding opportunity, and timing? I'll tickle Chief Tracy with this...
