**From:** Lewin  
**Sent:** Friday, January 30, 2015 8:01 AM  
**Subject:** FW: CPD Offender Images for Cook County

Let me know who we can send to this- perhaps Candella and/ or Carl-- the CC Sheriff contact is John Blair (below):

As part of yesterday's DHS/ Purdue site visit, we learned about another DHS-funded effort with Purdue, GARI, (Gang Graffiti Automatic Recognition and Interpretation, <http://www.purdue.edu/newsroom/general/2011/110818DelpGraffiti.html>).

This platform, in use by Indianapolis PD and soon to include the Cook County Sheriff, allows officers with smartphones to take pictures of gang graffiti for real-time analytics that can interpret the meaning of the graffiti and also build a database of graffiti locations and create notifications for city services (i.e. through an interface to 311-CSR, the Customer Service System). The platform can also interpret Hazmat placards and has addition potential for real-time mobile image assessment, and we could help shape its future development.

There would be no cost for our use if we want to participate, and Purdue is actually looking for an agency to host the application for the entire region; which we could do if it makes sense.

To further explore the concept, DHS invited us to send a few reps to a training event this Monday to be conducted by Purdue University; on-site at the Cook County as follows:

3026 S California BLDG 5 in the basement on Mon Feb 2 @ 1200 Noon.

Hey John,

Good to see you yesterday. We're meeting with DHS and Purdue on some tech projects today and Ed Delp from Purdue mentioned the GARY gang graffiti identification/ analysis effort; and said that you're getting trained at Noon on Monday. Could I send one or two people to watch? Also, Ed mentioned that he needs an agency to host the platform, and I offered CPD. We would create a virtual environment and provide space and access at no cost. Let me know your thoughts... I'm at cell 312-656-2311.

**Subject:** RE: CPD Offender Images for Cook County

Got it, then we can conclude it is a network issue.

Unfortunately I as the applications and database contractor have no access to assist with that.

You will need to be put in touch with Cook County and Chicago Police network engineers to set up another route and firewall opening between the two agencies.

Ask them to get you routed through to Chicago Police [REDACTED] a

Cook County [REDACTED] should already have a route through to that so maybe that can be a good starting point for them.

I thought we discussed on the phone that (according to notes from Morphotrack) you should be accessing the Mugshot Database server [REDACTED]  
You said you would try a Telnet session [REDACTED] that timed out then we could conclude that this was the wrong IP address or that the routing is not in place.

Please give Telnet a Try and also try a SQL Developer connect [REDACTED]

Your screen shot below shows you forgot to insert an IP address in the Hostname slot - [REDACTED]  
there. As discussed, the value shown in my screen shot is the local IP address from within the Chicago Police network so don't use that one.

[REDACTED] mentioned below are the ones you said you use to reach the CLEAR database server (a completely different machine) so those will definitely not work for mugshots. If you are reaching the CLEAR database listener, it does not recognize that service name so it will refuse connection.

Let me know how that goes.

Copying PSIT management to keep them in the loop as well.

Thanks,

**Scott Hilkert** | Partner, Clarity Partners LLC | 847.533.7179 Mobile

**Subject:** CPD Offender Images for Cook County

Hi Scott,

I hope this note finds you well. We received your contact information from Jonathan Lewin and we work with Robert McInerney at Cook County – Palantir serves as the data analysis platform for CCSO.

We currently have access to the CPD Clear Incidents and Arrests database but have been in search of a connection to query for offender images for some time. Jonathan indicated that you could help us with the details necessary to access the images. Previously, we were told we could access the images a [REDACTED] – however it doesn't seem that we can access that server or database due to firewall restrictions.

Let us know if you have an additional way to access the images or can assist us in removing the firewall restriction. If you'd like to discuss via phone, just indicate an available time.

Kind regards,  
Casey

Jon --

Great chatting earlier. Below is info about the training sessions we are hosting on Palantir next week. Send me the names of anyone from your units you'd like to have attend. I should have at least a few extra spots in each of the sessions.

My contact info is below, so please don't hesitate to reach out whenever. Happy to chat.

Take care,

BB

**Subject:** Palantir Training -- May 20-22

Hi Everyone,

Palantir will be back in town next week Tuesday May 20 - Thursday May 22 to conduct additional training sessions. We will be offering the Intro course again for anyone who missed that last time, as well as several sessions of advanced training for those who attended last month. I am attaching here the roster of individuals who attended last month's training for your reference.

Below you will find the dates and times that training will be offered, along with info on which level of training will be conducted during each time slot. Just as last time, you will need to register anyone from your unit who is interested in attending training. Please email me the names of individuals along with the date/time session they wish to attend. I will need your registration via email no later than noon on Friday, May 16th, please. I will send calendar invites for the sessions out that afternoon so you and your employees have time to plan.

**Sessions are as follows:**

Tuesday, May 20, 9:00 AM - 12:00 PM -- Intro (no previous experience required)

Tuesday, May 20, 1:00 PM - 4:00 PM -- Intro (no previous experience required)

Wednesday, May 21, 2:00 PM - 5:00 PM -- Advanced (previous 101 training required)

Thursday, May 22, 8:00 AM - 11:00 AM -- Advanced (previous 101 training required)

Thursday, May 22, 12:30 PM - 3:30 PM -- Advanced (previous 101 training required)

The Advanced training session will build upon the Intro, and will cover exporting profiles, timeline, team collaboration, creating and using filters, importing documents, and map analysis.

Classes will be held at South Campus, Building 5, Basement Training Room. Each session can accommodate up to 22 individuals. If there is an overwhelming demand for additional 101 Intro classes, we will do our best to add in an additional session to accommodate.

Please let me know if you have any questions. I can be reached at 312-590-0849.

Thanks much,

BB

Commander Caluris,

I hope you are well. I am reaching out to touchbase in follow-up from our meeting about potential ways Palantir may be able to initiate our relationship with CPD by supporting your team. Are you available to connect later this week or next to discuss?

Thank you,  
Katie

**To:** Caluris, Steven M. (Steven.Caluris@chicagopolice.org); Christoph Markson  
**Cc:** Lewin, Jonathan H.  
**Subject:** Palantir follow-up

Commander Caluris,

Thank you for your time on Thursday; we appreciated the opportunity to continue our discussion of potential partnership between Palantir and CPD. Christoph and I would like to continue our conversation about possible initial project starting points to explore together. It would be useful to learn more about your highest priority needs to analyze and action against gang-related activities, to then identify ways where Palantir could make a significant difference to your team's mission.

Please let me know if you would like to touchbase via phone later this week or share any ideas over email as a starting point. We look forward to exploring further with you.

Very best,  
Katie

Jonathan... I would still like to get together with you on a couple of topics. One being access to the Mugshots. Below is the last communication we received, but after our discussion, I would think the pictures are part of the database we already have access too. Can you clarify?

The other one is to get an update on streamlining the process between CPD and the CBC.

Bob.

Bob,

The mug shot information we received in the past is this:

[REDACTED]

However we can't currently connect to that DB. Could we please get [REDACTED] whitelisted for that DB? If possible it would also be great if we could receive VPN privileges for that server, though I suspect that this is a CPD box and thus not part of the NCC's subnet, am I right? Either way, who's our POC to get this done?

Thanks!

Christoph

Representatives from Palantir ([www.Palantir.com](http://www.Palantir.com)) will conduct a demonstration this Wed 4 June at 1300 Hrs in the HQ Multipurpose Room. Palantir is an advanced data mining and analytics platform now in use by the Cook County Sheriff, LAPD, NYPD, and many other organizations in the intelligence, law enforcement, defense, and financial services sectors. We are exploring the possibility of purchasing this tool and are looking for your feedback. Please feel free to send appropriate representatives.

Direct any questions to me... thx

Jonathan

Is Palantir something that could be useful for getting variables from unstructured data, along the lines of what SAS tried to do? I'm not familiar with it.

Good that Tracy did not say he was upset about not having seen the crime forecast or the beat dashboard.

On Oct 28, 2014, at Tuesday, October 28, 2014 8:18 PM, Lewin, Jonathan H.  
<[Jonathan.Lewin@chicagopolice.org](mailto:Jonathan.Lewin@chicagopolice.org)> wrote:

Interesting. We have not actually purchased Palantir yet, but will likely do so; partially because both the City and Cook County Sheriff have implemented it and there will be some cross-platform interoperability and cost-savings (potentially). I totally agree re: Palantir. I attended Chief Tracy's presentation with David Kennedy today on Custom Notifications; only about 20 people at most in attendance. Will brief you. He mentioned again how happy he was with our presentation and your SSL 3 work.

I met with that guy for breakfast this morning. It turned out he was actually quite pleasant after all. They are a company based in New Zealand that sells a lower cost alternative to Palantir. It sounds quite similar, so I guess it would not be of any interest to CPD, since you already have Palantir. They have not broken into the US market significantly - they mainly sell to Asia. Their applications are mainly around low-volume crimes, like financial crimes and organized crime, rather than things like burglaries.

The only slightly bad news is that they are trying to implement something like SSL within their link charting framework, but so far they are just beginning. He did not actually try to sell me anything, and did not express interest in meeting with you. I think he was more trying to learn about the state of our project and keep an eye on us. We agreed that we'd stay in touch in case there are future opportunities to collaborate in some way.

We had one point of agreement. He was very dismayed by the PredPol event. He said the product is very "rudimentary" and that he doesn't know of any other first-world country where the police chief could get up and do a sales pitch like the Atlanta guy did. He thought it was shameful.
