Subject: CPD CLEAR mug shots

Jonathan,

It was a pleasure speaking with you this morning and I look forward to following up next week.

On an unrelated note, I've been talking to Bob McInerney and John Blair (copied) about getting CLEAR mug shots in Palantir, and so far we've had no luck. There seems to be conflicting information as to where exactly those images live, and I am hoping you might be able to help me shed some light. So far, we have two possible scenarios:

1. Mug shots live in database name=cpdimage ████████████████████ – In this case, we've tested our connection and we do not have the ability to connect to this server. We would need our servers to be whitelisted in order to hit that box and pull images.
2. Mug shots live in the same exact location where the arrest data is captured, but we don't know what table/where and in this case we need someone to point us to schematics or something, we are not seeing them at present.

Can you help me clarify the issue and connect me with someone who can resolve this? As your colleagues who trained last week may have mentioned, it would significantly enhance user experience and utility if we had images to add to the individual records, so I really appreciate anything you can do to help us along here.

Subject: Re: wynyard

It comes from this military style of management. When you get used to ordering everybody around, I think you forget that the normal rules of human psychology are still in effect. You can order everybody to use SSL, but if they don't know or care what it is, it won't work out. In other words, you can order somebody to do something, but you can't order somebody to do it well. They have to want to do it, and know how to do it.

They should have involved us with selected users at the beginning to improve the product and get buy-in, and then have us do an orientation right away at CompStat to teach it to the bigger group and get them interested.

I think this is also why the custom notifications thing was such a mess. If nobody knows what it is, how can they do it right?

On Oct 28, 2014, at Tuesday, October 28, 20149:33 PM, Lewin, Jonathan H. <Jonathan.Lewin@chicagopolice.org> wrote:

Yeah, I think that was part of the disconnect.

Cmdr Jonathan H. Lewin

To: Lewin, Jonathan H.
Subject: Re: wynyard

PS Yes, I would like to hear what you learned from the custom notifications presentation. Schuetz and Hollywood said that the CPD intervention was a mess, and it is unclear what was actually done. They have a high opinion of you and me, but a low opinion of the way we interact with the rest of the department, and the way they use the tools.

On Oct 28, 2014, at Tuesday, October 28, 2014 8:18 PM, Lewin, Jonathan H. <Jonathan.Lewin@chicagopolice.org> wrote:

Interesting. We have not actually purchased Palantir yet, but will likely do so; partially because both the City and Cook County Sheriff have implemented it and there will be some cross-platform interoperability and cost-savings (potentially). I totally agree re: Palantir. I attended Chief Tracy's presentation with David Kennedy today on Custom Notifications; only about 20 people at most in attendance. Will brief you. He mentioned again how happy he was with our presentation and your SSL 3 work.

I met with that guy for breakfast this morning. It turned out he was actually quite pleasant after all. They are a company based in New Zealand that sells a lower cost alternative to Palantir. It sounds quite similar, so I guess it would not be of any interest to CPD, since you already have Palantir. They have not broken into the US market significantly - they mainly sell to Asia. Their applications are mainly around low-volume crimes, like financial crimes and organized crime, rather than things like burglaries.

The only slightly bad news is that they are trying to implement something like SSL within their link charting framework, but so far they are just beginning. He did not actually try to sell me anything, and did not express interest in meeting with you. I think he was more trying to learn about the state of our project and keep an eye on us. We agreed that we'd stay in touch in case there are future opportunities to collaborate in some way.

We had one point of agreement. He was very dismayed by the PredPol event. He said the product is very "rudimentary" and that he doesn't know of any other first-world country where the police chief could get up and do a sales pitch like the Atlanta guy did. He thought it was shameful.

Subject: FW: 2014 UASI Requests

Jon,
After speaking with Executive Director Schenkel, below please find correspondence between our office and the Cook County Sheriff's Office (CCSO) regarding their Palantir deployment and request for UASI funding to support the same.

It is my hope that this will both be helpful to your conversation as well as convey how we – the DHSEM – are trying to drive the regional intel collaboration message strong...these tools should be developed collaboratively and should be based around our regional Fusion Center, at CPIC – not siloed. The door is open for all to walkthrough, but money is not available for independent investments in stove-piped technology systems...

I would ask that you please keep the communication confidential between the Executive Director, COS Roussell, you and me.

We look forward to enhancing our cooperation and I remain hopeful that other parties may choose to join our efforts. I would like to follow-up ASAP on the idea of an MOU for some technology development on your systems related to emergency management.

Thanks,

Mike

To: Gary Schenkel <gary.schenkel@cityofchicago.org>
Subject: FW: 2014 UASI Requests

FYI, re UASI.

1

Mike,

I am very familiar with Palantir's previous deployments; both because Palantir previously sent us much of the information contained in the email below as well as because our department initially had conversations with the CCSO wherein we suggested that the CCSO, the DHSEM and the City work collaboratively to pilot Palantir technology as a cooperative endeavor. I was then informed, months subsequent, that the CCSO was moving along on its deployment. One of the issues with that deployment is that it did not meet, as a result of the limitations of the contract referenced, the broader all-hazards focus that our department would be interested in with respect to a data-ingest, analytics and dashboard system.

The nationally recognized Fusion Center for our region is the CPIC. As such, we are working very diligently to ensure all systems are fully supportive of and collaborative with the same, while maintaining and sustaining existing capacities within that system. The JRIC which you mention serves this purpose for the California agencies you reference. Similar to the Salt Lake City fusion center. In this, these are not merely regional intelligence centers, but entities which fulfill the same role which have also been designated by the federal government as Fusion Center. By the references, is it the desire of the CCSO is to seek Fusion Center status?

Moreover, the DHSEM, OEMC, and CPD have already developed a collaborative Common Operating Picture which is in use by all three agencies and which was developed and supported by the County's BOT; moreover, our critical incident management system has been deployed and in use by the City, County, State and FEMA. It would seem that all systems should integrate, as ours currently do.

As you are aware, the goal of the UASI is not to create multiple centers and duplicative technology and infrastructures. Given the efforts of the existing Fusion Center, both ongoing and in process, and the UASI support provided to the same, as well as our desire to ensure a seamless partnership with the Fusion Center through all we do, if – given the capability you reference below – there is interest in proceeding with a regional effort and seeking funding for the same, I would suggest a meeting between the CCSO, DHSEM, CPD, OEMC, DOIT and BOT to discuss a merged and collaborative effort. This would seem to fit right into what appears to be the intent of your system while guaranteeing a truly regional system.

Please let me know your thoughts.

2

R/

Michael

Michael,

As a follow-up to our meeting last week concerning our original UASI request as well as our supplemental report that was sent to you last Friday, I have received the following information concerning our Palantir request that I want to include with our request. For the below stated reasons, this request is important not only to the CCSO but to other law enforcement agencies as a very valuable asset to the Cook County region. This request would enable the CCSO to not only help sustain the existing resource but enable it to be expanded.

The Sheriff's Office Intelligence Center (SOIC) is a regional resource that is available to ALL law enforcement agencies throughout Cook County, and the entire Midwest region offering case support and situational awareness on a proactive and at-request basis. SOIC's doors are open to all who wish to make use of their resources, software and other investigatory tools. The Chicago Police Department takes advantage of these resources by assigning three detectives to work from SOIC full time. Palantir is a cutting edge software that connects previously disparate data sources into one single workspace to allow users the ability to take a regional view of crime trends, and engage in previously impossible high-level analysis. Palantir is connecting data sets from Chicago PD, CCSO, and all 128 suburban municipalities to allow for an unprecedented common operating picture. This is a resource that is now available to any and all law enforcement agencies who wish to take advantage of it, either through a SOIC analyst or investigator (as many suburban agencies work closely with SOIC this way) or by directly assigning someone to work from SOIC on a permanent or single-investigation basis. This regional collaboration is in the exact spirit of the Urban Areas Security Initiative and should be well received by those reviewing these requests.

Additionally, the precedent for supporting such an intelligence system, Palantir specifically, through UASI funds has been set by numerous other agencies throughout the country, including intel centers in Utah, NY, and several in California. In Los Angeles, the LAPD, LAFD, and LA Sheriff's Office all have Palantir deployments which are separately built, maintained, and funded by a combo of UASI and Capital dollars. The initial Palantir purchase was through the JRIC (Joint Regional Intelligence Center) which deployed Palantir prior to any involvement or use by LAPD or LAFD. The JRIC deployment was easily funded through UASI dollars as a regional intelligence center who offers resources to all who wish to make use of their offerings, very similar to SOIC. In Salt Lake City, the regional intelligence center used UASI funds to deploy Palantir in order to connect data from 12 agencies in the state of Utah, very similar to what SOIC is seeking to do by connecting calls for service data from 128 Cook County municipalities to arrest and jail data, to allow for a big picture of integrated data and high level regional analysis. While CPD might not be choosing to purchase a Palantir system of their own, it is certainly a resource that is available to them through SOIC and as such easily meets the regionally collaborative guidelines as set forth by UASI.

For all the above reasons, the CCSO hopes that our 2014 UASI request for this resource can be granted. If you have any questions, please feel free to contact me.

When connected via VPN, we have to tunnel through our servers normally – this is why there was no ip address in the hostname slot. We map ████████████████ through our CCSO serv████████████

Casey

Sorry I had not responded earlier.

I thought we discussed on the phone that (according to notes from Morphotrack) you should be accessing the Mugshot Database server ████████████████████████████████████

You said you would try a Telnet session ████████████████████████████████ned out then we could conclude that this was the wrong IP address or that the routing is not in place.

Please give Telnet a Try and also try a SQL Developer connection to ████████████████████████████

Your screen shot below shows you forgot to insert an IP address in the Hostname slot —Try entering ████████████████████ As discussed, the value shown in my screen shot is the local IP address from within the Chicago Police network so don't use that one.

████████████████████████resses you have mentioned below are the ones you said you use to reach the CLEAR database server (a completely different machine) so those will definitely not work for mugshots. If you are reaching the CLEAR database listener, it does not recognize that service name so it will refuse connection.

Let me know how that goes.

Copying PSIT management to keep them in the loop as well.

Thanks,

_____

Subject: RE: Palantir at CPD

Hema,

We can keep the first part of the meeting focused on the use case but due to budget meetings this week I won't be inviting too many end users-- we understand what the use cases will be, and if we ingest the right data sources the platform will support them. I think it's less about the use cases and more about the logistics of getting this going.

Or, alternatively, we can make the entire focus at Noon on the technology and logistics, which might be more beneficial since, like I said, we know the use cases.

Let me know your thoughts...

Thx

Cmdr Lewin,

I moved the meeting to noon. Should I change the location to OEMC?

Thanks,
Hema

No. It is on Oct 29th, 10:00 a.m. Officer Ford scheduled a tentative meeting on Oct 28th. We could not meet on that day and has been rescheduled. We will see you on the 29th.

Regards,
Hema

Required: Lewin, Jonathan H.; Margaret York (myork@palantir.com); Ford, Renee; Bryan Knight (bknight@palantir.com); Schenk, Tom
Subject: Palantir at CPD
When: Tuesday, October 29, 2013 10:00 AM-11:30 AM.
Where: CPD offices, 3510 S Michigan

Agenda:
1. Review follow-up questions on the Palantir platform
2. Detailed business use cases

Cmdr Lewin,
Please invite your team members. I would like to follow up on various different business cases we discussed in the initial meeting and build the scope for CPD pilot.

Thanks,
Hema

Bob,

Thanks again for the demo. Could you pass on your Palantir contact?

Thanks, looking forward to following up in the next week or so.

Take care,

1

Jonathan

Hey Jonathan,

I'm getting a parking spot for you in the Executive lot, north side of the building at 31st & California. Just let the officer know your name.

Call me when you get here and we will walk over to SOIC.

Bob.

Jon --

Great chatting earlier. Below is info about the training sessions we are hosting on Palantir next week. Send me the names of anyone from your units you'd like to have attend. I should have at least a few extra spots in each of the sessions.

My contact info is below, so please don't hesitate to reach out whenever. Happy to chat.

Take care,

BB

Subject: Palantir Training -- May 20-22

Hi Everyone,

Palantir will be back in town next week Tuesday May 20 - Thursday May 22 to conduct additional training sessions. We will be offering the Intro course again for anyone who missed that last time, as well as several sessions of advanced training for those who attended last month. I am attaching here the roster of individuals who attended last month's training for your reference.

Below you will find the dates and times that training will be offered, along with info on which level of training will be conducted during each time slot. Just as last time, you will need to register anyone from your unit who is interested in attending training. Please email me the names of individuals along with the date/time session they wish to attend. I will need your registration via email no later than noon on Friday, May 16th, please. I will send calendar invites for the sessions out that afternoon so you and your employees have time to plan.

Sessions are as follows:

Tuesday, May 20, 9:00 AM - 12:00 PM -- Intro (no previous experience required)
Tuesday, May 20, 1:00 PM - 4:00 PM -- Intro (no previous experience required)

Wednesday, May 21, 2:00 PM - 5:00 PM -- Advanced (previous 101 training required)

Thursday, May 22, 8:00 AM - 11:00 AM -- Advanced (previous 101 training required)
Thursday, May 22, 12:30 PM - 3:30 PM -- Advanced (previous 101 training required)

2

The Advanced training session will build upon the Intro, and will cover exporting profiles, timeline, team collaboration, creating and using filters, importing documents, and map analysis.

Classes will be held at South Campus, Building 5, Basement Training Room. Each session can accommodate up to 22 individuals. If there is an overwhelming demand for additional 101 Intro classes, we will do our best to add in an additional session to accommodate.

Please let me know if you have any questions. I can be reached at 312-590-0849.

Thanks much,

BB
